Education

M.S. in E-Business Management, University of Warwick Oct. 2017
Coventry, United Kingdom

- Thesis: “Online Consumer Behaviour of C2C Market in China: Trust, Risk, and Transaction Dynamics.”

B.A. (Hons) in International Business Management, Oxford Brookes University May 2016
Oxford, United Kingdom

- Capstone project on international market-entry strategy and comparative institutional analysis for a French manufacturing firm entering West African emerging markets.

Academic Research Experience

The Chinese University of Hong Kong, Shenzhen Jan. 2018–Jan. 2022
Research and Teaching Associate, School of Management and Economics Supervisor: Dr. Fenglong Xiao

- Supported Dr. Fenglong Xiao and collaborating faculty on empirical research in management and applied economics through literature synthesis, longitudinal dataset construction, empirical analysis, and manuscript development.
- Constructed, integrated, and validated longitudinal firm-, board-, and product-level datasets through data cleaning, entity resolution, variable coding, temporal alignment, duplicate checks, and regression-ready panel preparation.
- Assisted with variable operationalization and empirical materials for fixed-effects, logistic-regression, interaction, and robustness analyses; verified tables, variable definitions, references, and manuscript materials.

Shenzhen University Apr. 2022–Dec. 2024
Research Associate, National Social Science Fund of China General Project Supervisor: Prof. Xiaosong Zeng

- Contributed to *Ancient Sports Culture along the Maritime Silk Road* (Grant No. 19BTY108), examining the historical development, cross-cultural transmission, and cultural significance of ancient sports.
- Conducted Chinese- and English-language literature reviews, archival research, overseas source collection, academic translation, and thematic coding for comparative historical analysis.
- Supported source verification, fieldwork coordination, research reports, annual evaluations, administrative documentation, and final project completion.

Teaching Experience

The Chinese University of Hong Kong, Shenzhen Jan. 2018–Jan. 2022
Research and Teaching Associate

- Supported undergraduate teaching in *International Business* and *Strategic Management* through seminar facilitation, assessment, office hours, and academic guidance for approximately 100–150 students per semester.
- Achieved an average teaching evaluation of **4.7/5**.

Selected Research Projects

-
- Participated in Dr. Fenglong Xiao’s research on “Non-competes and innovation: Evidence from medical devices,” published in *Research Policy*, 51(6), Article 104527 (2022). Supported literature synthesis, product-level longitudinal data construction and validation, empirical-material preparation, and manuscript development.
 - Participated in Dr. Fenglong Xiao and collaborators’ research on “Board political connections and tradeoff between market and nonmarket advantages: Evidence from corporate financial information disclosure,” published in *Journal of Business Research*, 164, Article 113949 (2023). Supported firm- and board-level panel construction, governance-variable coding, empirical and robustness materials, and verification of tables, definitions, and references.

Professional Experience

Shenzhen Leshitong Co., Ltd.

Aug. 2025–Present

Business Development Manager

Shenzhen, China

- Monitored developments in electronics manufacturing, semiconductor localization, and AI hardware; contributed to product-line planning that extended the company's portfolio beyond SMT red adhesive into solder paste and photoresist-packaging solutions.
- Conducted market research across SMT red adhesive, solder paste, and photoresist-packaging products, tracking industry developments, competing offerings, pricing, and customer requirements to inform product positioning and business development.
- Coordinated new-product market introduction, including product-document preparation, packaging-specification alignment, supplier liaison, sample preparation, and follow-up on customer testing feedback.
- Developed relationships with electronics manufacturers, materials suppliers, distributors, and other industry customers; led product presentations, needs discovery, commercial follow-up, sample testing, quotations, and partnership discussions.
- Translated customer feedback on material performance, packaging formats, specifications, and delivery requirements into coordinated adjustments with suppliers and internal teams, improving product fit with customers' application scenarios.

Software and Data Tools

Python: data cleaning, transformation, dataset merging, exploratory analysis, and reproducible research workflows.

Stata: working knowledge of descriptive statistics, panel-data preparation, regression analysis, and robustness testing.

Microsoft Excel: advanced data cleaning, reconciliation, lookup functions, pivot tables, market analysis, and analytical reporting.

Research databases: CSMAR, Wind Financial Terminal, CNINFO, corporate annual reports, and public institutional records.

Reference management: Zotero and EndNote.

Languages: Mandarin Chinese (native); English (professional working proficiency).
